DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 3-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 3 is rejected as being indefinite for failing to further limit the invention of claim 1. The language of claim 3 including "forging specimen" is confusing and indistinct from the limitations of claim 1. Further, the last section of claim 3 reciting, "using the three-dimensional approximation of the shape of the transition zone within the rotor forging specimen and the boundary points of the transition zone within the rotor forging to produce the three-dimensional approximation of the shape of the transition zone within the rotor forging", is unclear. Please amend accordingly.
4. Claims 4-6 are rejected as being indefinite for depending from the confusing and unclear claim language of claim 3.

Allowable Subject Matter

5. The following is a statement of reasons for the indication of allowable subject matter:

6. The prior art fails to teach or suggest the method for processing a rotor forging as recited in claim 1, the method comprising the steps of casting an ingot having two different alloy regions that intermix to define a transition zone and then ascertaining boundary points of the transition zone to define a plurality of two-dimensional cross-sectional shapes and then using the plurality of two-dimensional cross-sectional shapes to produce a three-dimensional approximation of the shape of the transition zone.
